Number of records: 8

## Prehistoric

Ref	Site Name	Monument Types	Summary	Designation Re
<b>Monument</b>				
353	ICKNIELD WAY (Viatores Road 168)	Post Hole, Road, Ditch, Wheel Rut, Pit	An ancient routeway running through the county, present by at least the early Iron Age and possibly Neolithic in origin as a broad belt of passage. It does not appear to have been metalled during the Roman period and is suggested to have been a "service road" connecting villas and settlements to Watling Street at this time. It seems to have been formalised as a road in the medieval period. The suggested line has been traced from 18th and 19th century maps. It was crossed by Watling Street at Dunstable. The exact course is not always clear but at some points green lanes and aggers are visible. Crosses the county from Eaton Bray in the SW to Shillington in the NE.	1

Ref	Site Name	Monument Types	Summary	Designation Re
1392	MOUND on boundary	Round Barrow, Boundary, Earthwork, Mound	Slight mound, may be a round barrow or a more recent boundary marker.	1
10510	CIRCULAR CROPMARK, west of Norfolk House Farm	Site, Ditch	Irregular circular cropmark surrounding summit of slight rise. Excavation carried out nearby.	1
11078	POSSIBLE BARROWS, Bison Hill	Barrow	Three mounds, including one circular mound, are present within the bison enclosure. Their location suggests they are more likely to be spoil heaps than round barrows.	1

Ref	Site Name	Monument Types	Summary	Designation Re
15831	IRON AGE & ROMAN POTTERY, north east of Eaton Bray village	Findspot	Scatters of late pre-Roman Iron Age pottery, thought to indicate occupation in the area.	1
15842	IRON AGE & ROMAN OCCUPATION, Doolittle Lane	Post Hole, Ditch, Hearth	Scatters of late Iron Age and Roman pottery recovered by fieldwalking, a subsequent watching brief confirmed the presence of a settlement.	1
16492	CROPMARKS in North West of Eaton Bray parish	Site	Extensive rectilinear cropmarks, they appear to be drainage features.	1
